

AMC Deerbrook 24

AMC Deerbrook 24 is a theater complex built directly above a parking deck. The complex had difficulty keeping warm during the winter. It was determined that insulation needed to be installed on the roof deck and this needed to be done over the busy holiday season.

Building Specialties sprayed a two-inch layer of K-13 insulation in a Light Grey color that provided a high R-value and blended in well with the existing color scheme. We worked on a tight schedule, completing this project at night after closing time. Within days, management noticed a significant change in the temperature of the theaters directly above the areas of the roof deck that had been sprayed.

Location

AMC Deerbrook 24 Theaters, Humble, TX

Details

90,000 sq. ft. of Light Grey K-13 insulation
