

MD Anderson Cancer Center West Houston

This is a brand new 260,000 sq. ft. building for M D Anderson Cancer Center located on I-10 in West Houston. We furnished and installed HVAC insulation—installed duct wrap, rigid board, phenolic foam and foam glass insulation. All in all, we insulated 30,000 linear feet of chilled water and hot water piping and 250,000 square feet of duct insulation. This project took about 20 months and involved crews ranging in size from 5 to 15. It involved working with tight deadlines and stringent safety requirements.
